Make giving easier than ever for your donors with **DevMan's** integrated online giving portal. Online giving is fast, easy and safe and reduces your administration time and cost.

DevMan allows you to receive donations from your website by integrating with DevMan via a secure online payment gateway. The gateway acts as an intermediary between you and the bank, validating and transferring donations to your bank account. It is automatic, and most importantly, secure.
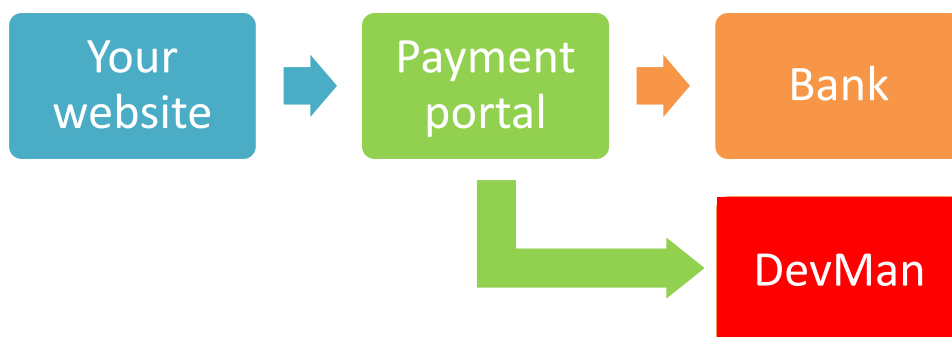

How it works

It has been proven that donors tend to give more if they are provided with a range of options - such as to use their credit card or to pay by EFT. The added convenience of being able to do this online is a win-win. The process is automatic – once the funds are processed the information is posted directly into DevMan. A payment portal provides a secure environment for financial transactions. The process is as follows:

- The donor submits a donation commitment via your website
- The donor is then routed to the secure payment portal which processes any credit card transactions or selected debit cards.
- The portal handles the transaction and pushes the donation details to DevMan.

Talk to your DevMan representative about setting up your online giving integration.

Your website	→	Payment portal	→	Bank

Payment portal → DevMan

What you need

DevMan currently integrates with Virtual Card Services (VCS). To set up your online giving portal you need the following:

YOUR WEBSITE
Allow donors to record their pledges via your website, by either:
- Implementing a link from your website to DevMan's pre-defined page
- Or enlist the services of your web developer to create a new page

MERCHANT NUMBER
Since obtaining a merchant number can be a time consuming process, we recommend using VCS as the merchant until there are sufficient donation volumes to warrant applying for your own merchant number.

Alternatively, to apply for your own, the following is required:
- Apply for an e-commerce merchant number - Contact your bank's Merchant Services Division and inform them you want to accept credit cards as payment as a MAIL ORDER merchant
- A business cheque account older than 6 months is required
- Ensure your bank creates a link for 3D Secure Trading

SIGN-UP WITH VCS
- Register with VCS by completing their application form
- Forward the Terminal ID to the DevMan team once received

WITHIN DEVMAN
The donations made via the online payment gateway will be fed directly into DevMan, allowing your organisation to maintain up-to-date and accurate records. A short introductory training session by the Devman support team is suggested.

Costs

Please see the VCS website for costs: www.vcs.co.za/customer.info/pricing

Depending on your bank there may be additional transaction fees.
